

2nd Grade Curriculum Fair Project: State

The Curriculum Fair is coming up! We will have it during National Lutheran Schools Week, the first week in March.

Talk to your parents about a state (not Missouri) that you would like to know more about!

Read as much as you can about your state. Find out the nickname, state symbols, what the flag looks like, area, population, and the date of statehood. Use that information to **fill out the information on the form** that is with this paper. Use that information to write a two or three paragraph report.

Make models or colorful illustrations of **two state symbols**.

Display your information in an interesting way. You may use poster board or a science board.

Do the project at home and bring to school by **February 20**.

Have fun!
